Fabien Maussion

Associate Professor
Department of Atmospheric and Cryospheric Sciences (ACINN)
Research Centre for Climate
University of Innsbruck
Innrain 52f, A-6020 Innsbruck
fabien.maussion@uibk.ac.at
Personal website: **fabienmaussion.info**
ORCID: **0000-0002-3211-506X** • GitHub: **fmaussion** • Twitter: **FabClimate**

Last updated: March 2023. Blue font indicates clickable links.

Professional career

From July 2023	**Associate professor** at the **School of Geographical Sciences**, University of Bristol
2021-2023	**Associate professor** at the Department of Atmospheric and Cryospheric Sciences (**ACINN**), University of Innsbruck **Habilitation** obtained in September with the title "**Numerical modelling of global glacier change**". *The habilitation is the highest university degree in Germany and Austria. It certifies the ability to be a full professor in these countries.*
2021	3 months research stay as "invited professor" (funded) at **Université Grenoble Alpes** & **Institut des Géosciences de l'Environnement**
2015–2021	Assistant professor at **ACINN**, University of Innsbruck
2014–2015	Post-doc at **ACINN**, University of Innsbruck
2008–2014	PhD then Post-doc at the **Chair of Climatology**, Technische Universität Berlin
2006–2007	Interim year as engineering trainee – Space mechanics at **C-S Group**, Toulouse

Education

2008–2014	**Technische Universität Berlin - Chair of Climatology** – PhD thesis **PhD Thesis** defended in February 2014 with the title "A new atmospheric dataset for High Asia : development, validation and applications in climatology and in glaciology" (highest honors). Supervisor: Dieter Scherer.
2007–2008	**Technische Universität Berlin** – International exchange year and Master degree

2008 Master degree at **SUPAÉRO** – Institut Supérieur de l'Aéronautique et de l'Espace, Toulouse (aerospace engineering school)

Awards

Wilhelm-Lauer-Preis 2014 (Akademie der Wissenschaften und der Literatur, Mainz): Prize for an outstanding, original PhD dissertation in the field of mountain geography.

Research projects conducted as PI or Co-I

>1M € of external funding secured over the past 4 years

2021–2024 **PROVIDE** – Paris Agreement Overshooting – Reversibility, Climate Impacts and Adaptation Needs (H2020, **230k€**). Co-I (total consortium **6M€**).

2022–2024 **A future-ready Open Global Glacier Model (OGGM)** (DFG, **180k€**, co-PI)

2022–2024 **HYdro power: iMpact on the ELecTricity sector in Austria due to Climate Change in glaciated high alpine areas (HyMELT-CC)** (Austrian Climate Research Programme, **50k€**). Co-I (total consortium **300k€**).

2021–2024 **UNCERTAIN** – Certainties and uncertainties in the future surface mass balance of mountain glaciers (**ÖAW**, **120k€**, together with PhD student **Lilian Schuster**)

2019–2022 **AgroClim - Huaraz**, "Water availability and water demand in the Peruvian Andes" (**ÖAW**, PI, **443k€**)

2022 UNESCO, IACS and WGMS support for the Randolph Glacier Inventory (PI, **20k€**)

2020–2022 **Scaling regional sea-level changes with climate forcings** (FWF, replacing previous PI Kristin Richter)

2018–2021 **Modelling glacier length changes in Alps on the base of tree-ring based temperature reconstructions** (Universtität Innsbruck, **120k€**, Co-I)

2019–2020 "Glaciers on the Cloud: **OGGM-Edu**" (PI, University of Innsbruck, **20k€**)

2018–2019 **The Upper Grindelwald Glacier as indicator for Holocene climate variability** (Tiroler Wissenschaftsförderung - PI, TWF, **10k€**)

Student supervision

PhD theses (current)

- **Lilian Schuster** (ACINN): Working on the uncertainty of large scale surface mass-balance models *(funded via **UNCERTAIN** grant)*
- **Patrick Schmitt** (ACINN): Working on the global glacier response under climate targets overshoot scenarios *(funded via **PROVIDE** grant)*

- **Lorenz Hänchen** (Institute of Ecology, co-supervised): Working on the spatio-temporal variability in water availability and demand in the Peruvian Andes *(funded via **AgroClim-Huaraz** grant)*
- **Niklas Richter** (ACINN, co-supervised): Atmospheric drivers of glacier change in High Mountain Asia *(funded via **internal grant**)*

PhD theses (completed)

- **Julia Eis** (Universität Bremen, co-supervised, 2020): Reconstructing glacier evolution using a flowline model (**link**)
- **Beatriz Recinos** (Universität Bremen, co-supervised, 2020): Ocean-glacier interaction on the large regional scale (**link**)
- **Anouk Vlug** (Universität Bremen, co-supervised, 2021): The influence of climate variability on the mass balance of Canadian Arctic land-terminating glaciers, in simulations of the last millennium (**link**)

Visiting PhD students

- **Rodrigo Aguayo** (Universidad de Concepción, Chile, 2022): working on glacier change and hydrology of Patagonia.
- **Li Fei** (Institute of Tibetan Plateau Research, China, 2020-2021): working on ice volume estimates in High Mountain Asia

24 completed master and bachelor theses. For a full list, visit **my personal website**.

Contributions to open source software and open data

OGGM Open-source global glacier evolution modelling framework (**oggm.org**). In active development since 2016, used by several research groups worldwide and in more than 25 publications, 3 completed and 8 ongoing PhD projects. *Project leader.*

OGGM-Edu Educational platform about glaciers based on the OGGM model (**edu.oggm.org**). Interactive applications, open-source graphics and computational notebooks applicable for teaching at the university level and for workshops. *Project leader.*

xarray Array manipulation software (**xarray.pydata.org**) very commonly used in all fields of geosciences. *Core developer since 2015*.

salem Map visualization and WRF model analysis software based on xarray (**salem.readthedocs.io**). *Main developer*.

HAR High Asia Refined analysis (**HAR**), openly accessible high-resolution climate dataset for the Tibetan Plateau and adjacent regions, which has facilitated an estimated several dozens of peer-reviewed publications. *Main developer.*

RGItools Suite of scripting tools and data accompanying the production process of the Randolph Glacier Inventory (**RGI**). Topography data (**RGI-TOPO**), data processing chain (**RGI-scripts**), and more. *Project leader.*

Administration and leadership

- Co-Chair of the IACS working group: **Randolph Glacier Inventory (RGI) and its role in future glacier monitoring and GLIMS** (2019–2023)
- Deputy chair (2017-2021) then chair (2021-) of the Innsbruck Doctoral College "**Mountain Climate and Environment**"
- Chair of the "working group on IT and software infrastructure" at **ACINN**
- Current research group in Innsbruck: 2 PostDocs, 4 PhD students, 5 Master students.
- PI or Co-I of 6 active research projects.

Other activities & services to the community

- Member of the CLIC working group: **Glacier Model Intercomparison Project** (since 2018)
- Member of the IACS working group: **Glacier ice thickness estimation** (2014–2019)
- Scientific editor: **Geoscientific Model Development** (EGU Journal, since 2020)
- Session convener **Observing and modelling glaciers at regional to global scales** (EGU2020-2022), **Climate modeling in Mountain regions** (**IMC2019**), **Scientific Committee** at **IMC2022**…
- Vice-president of the non-profit organisation **OGGM e.V.**, promoting science and research in the fields of climate and glaciology and coordinating the development of OGGM.
- Organized 6 OGGM workshops (2016-2022) and the 2019 Alpine Glaciology Meeting (Innsbruck).
- Organized a **week-long training on glacier modelling** in Lahore, Pakistan (2023)
- Reviewer: *J. Climate, J. Geophys. Res., Nature, Nature CC, J. Hydrometeorol., J. Hydrol., The Cryosph., J. Glaciol., Hydrol. Earth Syst. Sci., Earth Syst. Dynam., …*
- Member of the **International Glaciological Society**, **European Geosciences Union**, **International Association of Cryospheric Sciences**, **Météorologie et Climat**, **Österreichische Gesellschaft für Meteorologie**.

Teaching

Current teaching contribution: 8 hours per week (240 hours per year). All classes developed alone.

- **Physics of the climate system**: **advanced course in physical climatology** for graduate students (winter semester, 3hrs). Lecture practicals **available online**.
- **The cryosphere in the climate system**: **advanced course in glaciology** for graduate students (summer semester, 3hrs shared with others).
- **Introduction to climatology**: **entry level course in climatology** for undergraduate students (winter semester, 2hrs shared with others).
- **Introduction to programming for atmospheric scientists**: **bachelor level course in programming** for graduate students (summer semester, 3hrs). Lecture notes **available online**.
- **Scientific programming**: **master level course in programming** for graduate students (winter semester, 3hrs). Lecture notes **available online**.
- **Advanced scientific programming**: **advanced course in programming** for graduate students (summer semester, 2hrs). Lecture notes **available online**.

For a full list of past classes and links to annual student evaluations, visit **my personal website**.

List of publications

47 peer-reviewed publications, h-index 27 (google scholar March 2023)

Publications written by a student under my supervision are indicated with (*), and my 10 most relevant publications are indicated with (**#**)

Submitted / in review

1. *Malles, J., **Maussion, F.**, Ultee, L., Kochtitzki, W., Copland, L., Marzeion, B.: *Exploring the impact of a frontal ablation parameterization on projected 21st-century mass change for Northern Hemisphere glaciers*, J. Glaciol., accepted.
2. Recinos, B., **Maussion, F.**, Marzeion, B.: *Advances in data availability to constrain and evaluate ice dynamical models of Greenland's tidewater peripheral glaciers*, Annals of Glaciol., accepted.
3. Klein, C., Potter, E. R., Zauner, C., Gurgiser, W., Cruz Encarnación, R., Cochachin Rapre, A., and **Maussion, F.**: *Farmers' first rain: investigating 'pushpa' characteristics in the Peruvian Andes*, Environmental Research Communications, in review.

Peer-reviewed

1. **#** Rounce, D. R., Hock, R., **Maussion, F.**, Hugonnet, R., Kochtitzky, W., Huss, M., Berthier, E., Brinkerhoff, D., Compagno, L., Copland, L., Farinotti, D., Menounos, B. and McNabb, R. W.: *Global glacier change in the 21st century: Every increase in temperature matters*, Science (80)., 379(6627), 78–83, doi:**10.1126/science.abo1324**, 2023.

Field work

- 2009–2013: 7 one-month long campaigns to Zhadang Glacier (Tibet), 4 as expedition leader.
- 2012: Austfonna, Svalbard (3 weeks)
- 2014–2022: regular participation to mass-balance monitoring of alpine glaciers
- 2019: Huaraz, Peru (2 weeks), as expedition leader.

Invited presentations (selection)

- 2021 (AGU New Orleans): *Building software documentation for community engagement: lessons learned with OGGM.*
- 2020 (IARPC Collaborations): *OGGM - A modern, modular and extensible framework for large scale glacier modeling*
- 2020 (Austrian Society for Snow and Avalanches): *What open-source can do for you, and what you can do for open-source.*
- 2019 (IUGG Montreal): *Glaciology on the Cloud - Research and Education in your Web Browser.*
- 2016 (Universität Zürich): *Towards an Open Global Glacier Model including ice dynamics.*
- 2014 (AGU San Francisco): *Using Mesoscale Atmospheric Models for Glacio-Hydrological Studies at the Catchment Scale: Examples from High Asia and Perspectives for Future Applications.*

Press (selection)

- **Radio interview** for the Swiss scientific podcast CQFD (in French; **mp3 download**)
- **La Croix: Combien reste-il de glace dans les glaciers du monde?** (in French)
- **Carbon Brief: Global warming to date could 'obliterate' a third of glacier ice**
- **Phys.org: Glacier mass loss passes the point of no return, researchers report**
- **Süddeutsche Zeitung: Weniger Schmelzwasser aus den Bergen** (in German)
- **EOS: Glacial Census Reveals Ice Thicknesses Around the World**
- **TT: Weltweite Gletschermasse laut Studie bislang deutlich überschätzt** (in German)
- **ORF.at: Weltweit weniger Gletschereis als gedacht** (in German)
- **Krone.at: Gletschereis lässt Meeresspiegel ansteigen** (in German)
- **TT: Einhaltung der Klimaziele bremst Anstieg des Meeresspiegels** (in German)
- **ORF.at: 1,5-Grad-Ziel halbiert Meeresspiegelanstieg** (in German)
- **Der Standard: Gefährliche Dammbrüche im Hochgebirge nehmen zu**, also **on ORF**
- **UIBK: Negativrekord: Gletscherbilanz rutscht immer früher ins Minus** (in German)
- **ORF Science: Modell zeigt Abschied der Eisriesen** and the associated **podcast** (in German)

Other

- **Languages**: French (first language), German (second language), English (full professional proficiency), Spanish (good).
- **Interests**: music (drums and piano), outdoors, photography.
